So, is Maisel's rate in the MES bid ? Also, this assumes starting next week if Maisel is starting the Xcel job by 8/19, and we cannot have the pond, etc ready by that point.

Hi Matt:

We can have Pete Maisel from Silverton excavate portal at hourly rates, I will absorb mob and demob for his local 160 in our Lump Sum mob (but portal excavation itself is not in mob, of course).

If he is booked by the time this job is confirmed then we can rent a 160 from Honnen in Durango, in which case we would incur trucking at 135 per hr to mob and demob the rental unit, which would be at cost plus 15% to ER. Assume 5 hours each way. Our guys can operate no problem if that is what needs to happen.

Pete has told me he is supposed to do the roadwork for Hennis with his dozer, but Hennis has not finalized any arrangements as yet. It may be most efficient if we can get Pete's guys to do all surface earthwork in one time period. Pete would like to work on this but needs notice as soon as possible since this is the time of year that he is busiest.

If Pete gets booked up before a decision can be made, we can rent all necessary surface equipment and do whatever earthwork you need, including the roadwork, if Todd Hennis fails to handle that.

We have a 160 class excavator and 3.5 Cy loader in Dumont but it is not economic to haul them to Silverton if similar equipment is nearby. If rentals become unavailable those can be backup. As of

yesterday Honnen still had everything available, but rental manager stressed need to reserve ASAP due to high demand in fall season.

Mark

Thank you for the proposal. After a quick read I saw one thing that will need to be resolved and would like to let you know ASAP in respect to short time between award and anticipated mobilization. Part of the SOW is to open up the collapsed portal. I would think a 316 (or 320) would be very useful for that part of the SOW. You stated that if earthwork was required you would bring a 316 excavator at additional cost makes me wonder if something was lost in translation between information Nicholas was provided at the site walk and you. If you have equipment necessary for removing the overburden from the collapsed portal area covered in your current mobilization cost and crew plan, great. If not let me know the additional costs.

Importance: High

Ms. Jan Rick:

Attached is our proposal for subcontract services at the Gold King mine, in response to your Request For Proposal #G8-15-001. This proposal is tendered subject to satisfactory form of contract. Due to the very short timeframe for starting this project, if we do not receive at least an oral or emailed notice of intent to award to MES by 5:00 PM Mountain Time, August 15, 2014, or a request for extension of time for consideration of this proposal, we will assume you have made another selection and will consider this to

be expired.

Please do not hesitate to contact us if you or other ER personnel have any questions.

We thank you for the opportunity to be considered for this project, and hope that we may be of assistance to ERLLC at the Gold King Mine.

Sincerely,

Mark Levin
